

## #043 WHAT MANAGEMENT IN TIMES OF CRISIS 1/2?

Distribution

Industriel

Management

THE HEALTH CRISIS IS HURTING THE ECONOMY AND GENERATING FEARS:

Fear of people for their health and that of their loved ones,

Fear of economic actors for their future, the sustainability of their jobs or their companies.

In this sense, these unprecedented circumstances call into question the modes and foundations of managerial authority.

**First of all, we need to hear people's worries and fears**, especially when they come back to work in their factory or warehouse after a weekend spent listening to the sometimes very anxiety-provoking news.

**Then take action by implementing good protection practices (see our fact sheets)**, even if it means being inventive, not only in terms of prevention: some companies ask their employees to take their temperature when they get up in the morning, even if it is checked at the entrance to the sites; but also in terms of entertainment: some companies set up new measures based on post-weekend exchanges.

## Yann de Féraudy

Président de l'ASLOG  
Deputy CEO Operations & IT Groupe Rocher

### | About ASLOG

**ASLOG brings together more than 400 companies from all sectors**, with 2,000 professionals working together to promote and build tomorrow's Supply Chain. ASLOG is a neutral and independent association that addresses Supply Chain issues.

**As early as 1972, visionary men sensed that this function would be decisive for all companies.** For almost fifty years, professionals in the sector have made ASLOG the reference partner.

ASLOG is the privileged interlocutor of institutions and public authorities on all questions relating to the sector.

### | #supplychain4good

The **#SupplyChain4Good** community was created at the initiative of Michelin and ASLOG, as part of the Movin'On ecosystem, in favor of a more sustainable mobility of goods.

**#SupplyChain4Good's** ambition is to federate the actors who work for Supply Chains that are simultaneously good for the planet, the people and the business performance. The members of this community are «shippers» (industrial and commercial companies), «operators» (transporters, logisticians, shipping companies, ports...), «support functions» (academics, consultants, information systems, regulators, NGOs...).

They cover all economic sectors and all regions of the world. Their work takes place throughout the year and culminates in the annual Movin'On Summit, the world summit on sustainable mobility.
