

#047 WHAT ARE THE BASIC ACTIONS TO IMPLEMENT FOR A GOOD AGILITY OF YOUR SUPPLY CHAIN INFORMATION SYSTEMS?

Distribution

Industriel

Digital

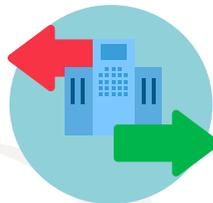

Agility, collaboration between the various commercial and logistics players, and the ability to respond quickly are among the qualities required of your Supply Chain Information Systems. A number of ongoing projects are aimed at increasing interconnectivity and interoperability.

Whatever your maturity in these areas, **it is key that your IT systems are aligned with the “business” at all costs and meet their service continuity obligations: this is known as an IT Continuity Plan or Maintenance in Operational Conditions.**

IF SUCH A PLAN EXISTS, IT SHOULD FIRST BE REVISITED IN THE LIGHT OF THE COMPANY'S SITUATION, OTHERWISE A FIRST VERSION SHOULD BE STARTED. THE FEW BASIC ACTIONS ARE :

Ensure the robustness and security of the technical infrastructure (cloud, cybersecurity, secure remote access...) and bandwidth

Review priorities between flows and limit flows for some

Confirm the availability of internal tools and their maintenance, but also of IT service providers (Data Center, Hosters, TMA...)

Updating the parameters of the main business applications (APS, MES, WMS...) to take into account the new organisational situation specific to the current context and its different stages of evolution.

In all cases, always keep in mind that there should not be any “break in the flow” and a permanent interaction between the IS and the Supply Chain.

Bruno Coste

Founder and CEO at adameo consulting group.
A booster for your Supply Chain transformation

Bruno dispose d'une expérience de plus de 20 ans en Supply Chain Management dans des postes de direction en France et à l'International alliant conseil, prestations de services, élaboration de schémas stratégiques, management de projets, pilotage des Systèmes d'Information & Innovation...

Une conviction : les Hommes sont au cœur de la réussite et de la performance des organisations.

| About ASLOG

ASLOG brings together more than 400 companies from all sectors, with 2,000 professionals working together to promote and build tomorrow's Supply Chain. ASLOG is a neutral and independent association that addresses Supply Chain issues.

As early as 1972, visionary men sensed that this function would be decisive for all companies. For almost fifty years, professionals in the sector have made ASLOG the reference partner.

ASLOG is the privileged interlocutor of institutions and public authorities on all questions relating to the sector.

| #supplychain4good

The **#SupplyChain4Good** community was created at the initiative of Michelin and ASLOG, as part of the Movin'On ecosystem, in favor of a more sustainable mobility of goods.

#SupplyChain4Good's ambition is to federate the actors who work for Supply Chains that are simultaneously good for the planet, the people and the business performance. The members of this community are «shippers» (industrial and commercial companies), «operators» (transporters, logisticians, shipping companies, ports...), «support functions» (academics, consultants, information systems, regulators, NGOs...).

They cover all economic sectors and all regions of the world. Their work takes place throughout the year and culminates in the annual Movin'On Summit, the world summit on sustainable mobility.
