

THE SUPPLY CHAIN FACING THE COVID-19 CRISIS:

100 QUESTIONS FOR ANSWERS BY ASLOG

#070 IN THE CONTEXT OF SETTING UP TELEWORK, ARE THERE ANY RISKS THAT ITS CYBER INSURANCE POLICY WILL NOT APPLY IN THE EVENT OF AN ATTACK?

Distribution

Industry

Insurance

THE MANAGEMENT OF THE COVID-19 CRISIS IS LEADING COMPANIES TO MAKE MASSIVE USE OF TELEWORKING.

This modus operandi results in a **potentially less secure IT working environment** (VPN access, etc.) than on the company's premises, making the data in the company's possession and its **information systems more vulnerable to a Cyber attack**.

Furthermore, given that the priority of crisis management is to ensure maximum business continuity, **certain IT lines of defence may be neglected or reduced during this period**, leading hackers to carry out cyber attacks (ransomware, intrusion into information systems, etc.).

Finally, given that employees with laptops must take them out every night for security reasons to ensure business continuity outside the company if necessary, the risk of loss or theft of a computer with sensitive data is increased.

Cyber insurance policies are designed to operate and cover the financial consequences of these claims as long as the level of risk protection has not been downgraded in relation to the underwriting of the policy.

Given the increased exposure to Cyber risks, a lack of Cyber insurance or an insufficient Cyber coverage limit could potentially lead to actions against officers (claim based on a lack of insurance).

Gras Savoye Willis Towers Watson

À propos de Gras Savoye Willis Towers Watson est une entreprise internationale de conseil, de courtage d'assurance et de solutions logicielles qui accompagne ses clients à travers le monde afin de transformer le risque en opportunité de croissance. Nous concevons et fournissons des solutions pour gérer le risque, accompagner les talents et optimiser les profits afin de protéger et de renforcer les organisations et les personnes. Notre vision, unique sur le marché, nous permet d'identifier les enjeux clés au croisement entre talents, actifs et idées : la formule qui stimule la performance de l'entreprise.

| About ASLOG

ASLOG brings together more than 400 companies from all sectors, with 2,000 professionals working together to promote and build tomorrow's Supply Chain. ASLOG is a neutral and independent association that addresses Supply Chain issues.

As early as 1972, visionary men sensed that this function would be decisive for all companies. For almost fifty years, professionals in the sector have made ASLOG the reference partner.

ASLOG is the privileged interlocutor of institutions and public authorities on all questions relating to the sector.

| #supplychain4good

The **#SupplyChain4Good** community was created at the initiative of Michelin and ASLOG, as part of the Movin'On ecosystem, in favor of a more sustainable mobility of goods.

#SupplyChain4Good's ambition is to federate the actors who work for Supply Chains that are simultaneously good for the planet, the people and the business performance. The members of this community are «shippers» (industrial and commercial companies), «operators» (transporters, logisticians, shipping companies, ports...), «support functions» (academics, consultants, information systems, regulators, NGOs...).

They cover all economic sectors and all regions of the world. Their work takes place throughout the year and culminates in the annual Movin'On Summit, the world summit on sustainable mobility.
